(747)-745-4732 | [siddharthreddy1103@gmail.com](mailto:siddharthreddy1103@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## EDUCATION

**California State University, Northridge**  
*Master of Science in business Analytics — GPA: 3.6*

Northridge, CA  
*August 2024– May 2026*

**Anurag University**  
*Bachelor of Technology in Computer Science — GPA: 3.6*

Telangana, India  
*June 2020– June 2024*

## EXPERIENCE

**Data Analyst Intern**  
*Pobyt*

Jan 2023 – Jan 2024  
*Hyderabad, India*

- Utilized **Python** to analyze large datasets, writing scripts that automated data processing and uncovered patterns in customer behavior, leading to a 15 percent improvement in campaign targeting accuracy.
- Designed and deployed dynamic dashboards using **Tableau** to visualize KPIs such as sales growth and customer churn, making complex data understandable for department heads and enabling quicker decisions.
- Wrote efficient **SQL** queries to pull, join, and aggregate data from multiple relational databases, reducing report generation time by 40% and supporting weekly business reviews.
- Used **Excel** to clean, normalize, and structure raw datasets containing missing and inconsistent values, ensuring 100% accuracy before analysis and improving the quality of insights shared with stakeholders.
- Created interactive visual reports using **Power BI**, helping leadership monitor daily operational metrics and uncover performance gaps that led to corrective actions in underperforming regions.

## PROJECTS

**Recover Ease - The Lost Item Solution Using Deep Image Search** | *Python, SQL, Tensorflow* Jan 2024 – May 2024

- Designed and developed an AI-powered lost item recovery system using **TensorFlow** and **Keras**, implementing deep image search to match lost and found item images with high accuracy
- Engineered the backend with **Django** and **SQLite**, creating a scalable web application that supports image uploads, user authentication, and lost/found item management.
- Built a custom image comparison engine using **OpenCV** to enhance object detection and similarity matching between submitted and found item photos.
- Conducted end-to-end integration and testing of user interface, image recognition module, and backend logic to ensure smooth user experience, enabling individuals to search or report lost/found items within seconds.

**Healthcare Management Database System** | *Python, HTML, MSAccess, SQL* August 2024 – December 2024

- Built a centralized relational database using **MySQL** to manage critical hospital operations like patient records, appointments, treatments, and billing, ensuring data accuracy and easy access.
- Designed a fully normalized **ER model** with clear entity relationships, applying business rules and cardinalities to structure a scalable and error-resistant healthcare data system.
- Automated appointment scheduling and billing through **MS Access forms** and **SQL queries**, reducing manual errors and improving administrative efficiency for staff and patients.
- Developed **advanced SQL queries** to track department performance, doctor activity, and billing summaries, supporting better decision-making through actionable reporting.
- Used **Python** and **Jupyter Notebook** to connect with the SQLite database, analyze patient and billing data, and validate system logic during testing and development.

## SKILLS

**Data Analysis Tools:** Python(Pandas, NumPy, Matplotlib), SQL, R, Excel  
**Database Management:** MySQL, Microsoft SQL Server, PostgreSQL, Snowflake  
**Data Visualization:** Tableau, Power BI, Google Data Studio  
**Cloud Platforms:** AWS, Google Cloud Platform, Microsoft Azure  
**Predictive Modeling:** Scikit-learn, XGBoost, TensorFlow, Time Series Forecasting
